ABSTRACT

This bibliography of generative-based grammatical analyses of Spanish provides an enumerative supplemental listing of entries not included in two recently published annotated, critical bibliographies (Nuessel, 1978, 1979). The majority of the entries of this supplemental document cover the period of 1976-1979, but a few entries date before 1976. There are two separate sections: phonology/morphology and syntax/semantics. A total of 95 entries are included. (SW)

I. Purpose

The purpose of this bibliography is to provide an enumerative supplemental listing of entries not included in two recently published annotated, critical bibliographies of generative-based grammatical analyses of Spanish (Nuessel 1978, 1979). The majority of the entries in the present list covers the period of 1976-1979. However, there are a few entries that date before 1976 because they have just come to my attention recently.

II. Arrangement

This bibliography is divided into two separate sections: Phonology/Morphology and Syntax/Semantics. It is arranged alphabetically by author. In the case of multiple entries for a single author, the bibliographical references are arranged chronologically and alphabetized by title for each year. All references to reviews, other annotations and abstracts are contained in brackets. All of these are arranged chronologically also. Whenever a reviewer is known, he or she is identified in parentheses. There is a "List of Abbreviations" on pages 11-13, and "Related Bibliographies" on page 13.
